SUMMARY

Full Stack Developer with 5 years of experience in software engineering and development. Highly skilled in designing, developing, and troubleshooting high-performance web applications. Adept in problem-solving and debugging software with the ability to create technical solutions from scratch.

EXPERIENCE

Full Stack Developer
Runtime Revolution   **October 2021 –September 2023, Remote**
· Collaborated with a company specializing in product visualizations for rooms.
· Spearheaded the product creation feature.
· Executed a project for a renewable energy company.
· Pioneered the creation of an MVP (Minimum Viable Product) for a specific product, leading a team of 2 developers.
· Concentrated on mobile development, primarily encompassing version increments and updates to the mobile app.
· Additionally contributed to the main project by actively participating in the refactor of the React web app to enhance product quality and performance.
· Supported the team in migrating all products to an Nx-based solution.

Full Stack Developer
Porto Editora   **January 2020 – September 2021, Porto, Portugal**
· Engineered apps for EscolaVirtual and orchestrated the overhaul of the administration platform.
· Orchestrated a team of 3 members to architect a platform for the management of Escola Virtual (evAdmin).
· Oversaw node development as a core responsibility, crafted React solutions including a chat system, and constructed two administrative platforms.
· Instituted code reviews for all React projects within the team.

Full-Stack Developer
Freelancer   **September 2018 – December 2019, Lousada, Portugal**
· Conceptualized and crafted an app from inception to the final version.
· Constructed an app for locating specific wines in nearby restaurants or wine cellars, employing Android and Swift for mobile development, React for the admin page, and Node.js for backend functionality.
· Designed and implemented the database using MongoDB.

PROJECTS

Software Developer/ Product developer
February 2015 - December 2015
· Developed the "Think Green" project, a unique app concept.
· Designed it to function as both a green social network and a CO_2 measurement game for households.
· Implemented features to calculate and track the ecological footprint of each user.
· Focused on promoting eco-consciousness and sustainability through technology.

EDUCATION
